

# Worlds most advanced 6.5" TFT LCD's for any PC applications

Developed by FIKO Technologies

## In-Vehicle System

*Includes embedded uFDEX (TM) network and comes with WAY iD4x - SiRF Star III GPS and Tri-band GSM as option for AVL, GPS navigation or fleet management.*

GRAFIKO is a display system that you can program to fit your own vehicle software functions or software design without the use of keyboard.

In-Vehicle Display System

GRAFIKO 640 Display Series

READY TO GO WITH ANY VGA DISPLAY CARD

If you're looking for a display to be used in your vehicle, aircraft or boat and in the same time are looking for a rugged system you want to grow with? Well then there is no doubt that you have found your right choice with GRAFIKO 640 series.

### We are focusing on your needs

As an R&D centre, manufacturer and distributor, we are focusing on our customers' needs. Instead of slick design with poor functionality, we are focusing on rugged design and high quality using sophisticated microcontroller programming leaving all other embedded display manufacturer behind. Our aim is not to be the cheapest on this market, but compared with solid design and offered functions we definitely have a price you can afford and we trust you will just love it....

### Fully programmable to fit your software

Trough our original development uFDEX (Micro Fiko Data Exchange) network and control system, the GRAFIKO displays can be set-up and programmed "on-the-fly" to fit any Windows, Linux or Mac software.

Colour TFT with GPS/GSM

CE RoHS

EMBEDDED TECHNOLOGIES:

GRAFIKO 640 Series

### Stunning features not found by other embedded colour TFT display brands

In today's market place for embedded TFT displays, there is several displays to be found, but very few offer functions that directly can be programmed to fit your needs and software functions. If you're looking for display for your in-vehicle applications, experimental aircraft or marine boats, GRAFIKO 640 Series are than just what you're looking for as its so unique that you can, with all its features use it as a universal display.

## GRAFIKO FEATURES

- Integrated DC-DC switching power supply for wide voltage input range (with power off function).
- 14 illuminated programmable aluminum buttons for PC PS/2 keyboard functions.
- Rugged anodised aluminum frame (colours option)
- USB on the front that connects to PC USB port.
- 15-pin analogue VGA connection.
- Integrated uFDEX Master and uFDEX Sharemate to program and control functions for;
  - frame keyboard and its ASCII codes.
  - internal buzzer for warning and alarm.
  - full On-Screen-Display (OSD).
  - internal microcontroller reset.
  - Sleep and engine start (power saving - wake up).
  - Dim of illuminated frame keyboard buttons.
  - Dim of LCD backlight.
  - USB protection for ESD.
  - Global Positioning System\* (GPS)
  - GSM mobile phone - with direct GPRS connection\*
  - VESA mounting 75 x 75mm and 100 x 100 mm
